HOW TO START · 90-DAY PILOT WINDOW

1

Scan QR · book a 30-min call

LIVE demo + your patient cohort. Synthetic-only on the call. No PHI exchanged.

2

Sign BAA + free pilot agreement

Free 90-day pilot. Cognizant Health Sciences referral path. AWS Bedrock infra cost included.

3

Production decision in 90 days

Auto-promote to Growth tier OR walk away. No lock-in. No cancellation fee.

1 • BUSINESS MODEL

Per-case fee. 3 tiers.

Sold to provider organisations — hospital systems, oncology practices, FQHCs. Per-case fee with volume tiers. Land via 200-bed centres, expand by adding specialty drug classes, distribute via Cognizant Health Sciences enterprise procurement.

PILOT

Pilot
per decided case
\$9

< 500 PAs / month

- ✓ 90-day pilot window • free first 2 partners
- ✓ Slack channel + onboarding
- ✓ Basic compliance pack
- ✓ Land at 200-bed centre

★ MOST CHOSEN

Growth
per decided case
\$6

500 – 5,000 PAs / month

- ✓ Multi-drug-class expansion
- ✓ Custom payer policies
- ✓ Quarterly evidence packs
- ✓ SLA + dedicated CSM

ENTERPRISE

Enterprise
per decided case
\$4

> 5,000 PAs / month

- ✓ Self-hosted (BYO Bedrock)
- ✓ TriZetto integration tier
- ✓ Cognizant procurement vehicle
- ✓ Custom IAM / SOC 2 attestation

Land • Expand • Distribute

1 • LAND

200-bed centre
A regional cancer centre at ~150 oncology PAs/month, ~\$1,800 revenue impact per case from delay reduction. Pilot tier **\$1,350/mo**. Payback under 1 day.

2 • EXPAND

Drug-class adjacency
Add GLP-1, MS, transplant, rheumatology to the same account. **4-8x case volume** per account. Move to Growth tier. Same agent architecture, fixtures-only change.

3 • DISTRIBUTE

Cognizant procurement
Slot into the existing **Bedrock + Sonnet + MCP** enterprise stack Cognizant already sells. Same auth, same observability, same vehicle as TriZetto.

GO-TO-MARKET • COGNIZANT HEALTH SCIENCES

The unfair distribution advantage.
Cognizant Health Sciences sells in **47 of the top 50 US payers** and **200+ provider organisations**. Authrex slots into that exact distribution channel — same procurement workflow, same enterprise ELA, same IT&S onboarding. **We don't sell to one hospital at a time. We sell to the channel.**

MARKET

•

ROADMAP

•

ADJACENT

2 • MARKET HIERARCHY

\$30B → \$200M → \$20M.

The total US prior-auth waste, the addressable specialty-PA segment Authrex serves at \$5/case, and the realistic 5-year capture target through Cognizant distribution. All figures sourced.

TAM

\$30B

Annual US prior-auth admin waste.
CAQH INDEX 2024 • 600M PA decisions/year all classes

SAM

\$200M

US specialty-drug PA market at \$5 average price/case • 40M oncology PAs/year alone.
CAQH 2024 + ASCO QOPI 2024 • oncology grew 38% YoY

SOM

\$20M

5-year capture • 10% of specialty PAs via Cognizant Health Sciences distribution.
Conservative • assumes only Cognizant existing accounts

3-year roadmap

Q3 • 2026

First pilot — Tata Memorial Centre, Mumbai
Wedge: trastuzumab + pembrolizumab cohort. ~80 cases/month. Aetna India + UHC. Outcome: 90-day pilot to first paying month.

Q4 • 2026

Second pilot — Apollo Hospitals, Hyderabad
Wedge: EGFR + HER2 + MSI-H cohort. Validates multi-payer arbitration. **Both pilots paying by Dec 2026.**

Q1 • 2027

TriZetto integration • Cognizant payer-side go-live
Structured-envelope submission to TriZetto adjudication API. Closes the provider→payer loop. **CMS-0057-F mandate enforcement Jan 1.**

Q3 • 2027

Series-A • \$4-6M target
Use of funds: 3 more agents (UM, claims, RCM), AWS Marketplace listing, 8 Cognizant referral channels.

2028

Adjacent verticals + \$5M ARR run-rate
UM (Q1) • Claim Denials (Q3) • 10 enterprise accounts by Q4 • Cognizant strategic option triggered.

Adjacent markets — same architecture, different payload

The 7-agent LangGraph DAG is payload-agnostic. Each adjacent market is a fixtures + prompts swap, not a re-architecture. Together: ~6x the prior-auth TAM.

Utilisation mgmt
Inpatient stay justification, level-of-care matching
+2 - 3 x TAM

Claim denials
Auto-appeals on rejected claims, same NCCN engine
+1.5 x TAM

Revenue cycle
Coding audit, charge-capture validation
+2 x TAM

Sources: CAQH Index 2024 (PA volume + waste) • AMA 2024 (manual cost baseline) • KFF 2024 (overturn rate) • ASCO QOPI 2024 (oncology PA volume) • CMS Federal Register CMS-0057-F (mandate timing) • Cognizant 10-K 2024 (channel reach).

COMPETITIVE LANDSCAPE • WHY THIS WINS

No one else does *provider-side* + *FHIR-native* + *citation-grounded* + *appeals-as-side-effect* on a multi-agent LangGraph DAG.

Olive AI
FOLDED • 2023
\$852M raised → ran out of runway. Workflow automation, not multi-agent.

Notable
PAYER-SIDE
Adjudication-side. Doesn't help the doctor. No appeal generation.

Cohere Health
UM ONLY
Utilisation management focus. Not oncology-deep, not appeals-aware.

Authrex
PROVIDER • ONCOLOGY
7-agent DAG • NCCN-cited appeals • CMS-0057-F native. Cognizant-stack.
